PROFILE

Business graduate and AI product builder focused on creating privacy-first web applications and modern digital experiences. I design, develop, and deploy browser-based tools using HTML, CSS, JavaScript, Git, GitHub, and Vercel while leveraging AI-assisted development to rapidly solve real-world problems. Passionate about product thinking, continuous learning, and building software people genuinely enjoy using.

FEATURED PROJECTS

- Personal Portfolio

HTML · CSS · GitHub · Vercel

 - Designed and deployed a fully responsive personal portfolio on a custom domain
 - Structured the site to clearly showcase projects, skills, and professional journey
 - Set up a GitHub → Vercel deployment pipeline for fast, reliable updates

neerajnandan.com
- Image Suite

HTML · CSS · JavaScript

 - Built a privacy-first browser tool for JPG, PNG, and WebP image conversion
 - Implemented fully client-side processing so files never leave the user's device
 - Designed a clean, responsive interface for fast, intuitive conversions

vishnuharshan.com/image-suite
- PDF Suite

HTML · CSS · JavaScript

 - Developed a browser-based utility for merging, splitting, and converting PDFs
 - Removed the need for server uploads, prioritizing user privacy and speed
 - Built a responsive interface usable across desktop and mobile

vishnuharshan.com/pdf-suite
- TrendCoin

Branding · Strategy · Roadmapping

 - Designed the brand identity and go-to-market roadmap for a blockchain token project
 - Applied product thinking to shape token utility and early positioning
 - Currently leading the project through active development

Personal Project

ACHIEVEMENTS

- Independently designed, built, and deployed three live web-based products (Portfolio, Image Suite, PDF Suite)
- Conceived and led branding, concept, and roadmap for an original blockchain project end-to-end
- Completed a BBA degree while self-teaching modern web development and AI-assisted coding
